

To whom it may concern:

We all know what happened in Chicago. Cheapest land was purchased to push black folk into these ghettos.

And now, we have predatory builders doing much the same. Buying land in the poorest neighborhoods to build as they please, creating high density neighborhoods without considering consequences of this kind of density. These consequences largely ignore sewer capacity, infrastructure restrictions, environmental and habitat protection and historic preservation.

Is this part of the new world order plan to create less oil and gasoline for their green new deal? To take away the freedom to travel as a free people?

The vaguely written bill is not for the people. A bill should be concrete and easily understood for the people!

Giving predatory builders and easy way to build like this does not create the diversity everyone is talking about.

And again, this is a way to shove people into small spaces, and the only way they will get around is by or bus. It does not at value, but denies people to live in harmony with nature! A God given right!

Public participation is also a God given right for the people to have a say about their neighborhoods!

The ban on public hearings would in turn restrict or remove your current ability to intervene to raise environmental and historical preservation issues under Connecticut's Environmental Protection Act (22a-19).

Scrap this bill!
